There is currently one type of vaccine bait, the Ultra-lite containing ONRAB®, that is used in Ontario for both fox strain and raccoon strain rabies control. Exposure to the bait is not harmful to people or pets; however, in the unlikely event that people or pets come in contact with the vaccine contained in the bait, contacting a doctor or veterinarian as a precaution is recommended.

**Bait Ingredients**

The bait formula coats the blister pack containing the vaccine. This formula consists of vegetable based fats, wax, icing sugar, vegetable oil, artificial marshmallow flavour and dark-green food grade fat-soluble dye.

**Blister-pack (Vaccine Carrier)**

Ultra-lite
This is a polyvinyl chloride (PVC) blister pack (40 mm x 22 mm x 10 mm) which weighs approximately 4.3 grams. The blister pack is a teal green polyester flocked container with a heat-sealed laminated polyester lidding. The body of the blister pack is embedded in the bait matrix but the green lidding is exposed and has a black warning label printed on it.

**Vaccine in Baits**

ONRAB® oral rabies vaccine
Description: a recombinant live virus liquid vaccine
Volume/bait: 1.8 ±0.1 ml in the blister pack
Other inclusions: vaccine stabilizers
Colour: pale orange to pale pink
Target species: skunk, fox, and raccoon
