

Application Engineering, Engineered Solutions

Mississauga, ON

Lakeside Process Controls Ltd. ('Lakeside') is recognized as a market leader, providing complete automation solutions to a wide range of industries. Our capabilities in process management and industrial automation enable us to solve our customers' process automation challenges, keeping their operations running safer.

Our solutions range from devices that measure and relay diverse physical and chemical conditions, devices that control flow of materials, networks that transmit event-related information, to process control systems that collect information and trigger necessary actions to ensure continued operations.

Lakeside's success is due to its exceptional people. Our skills and passion for our work is the key to our strong business results. Our commitment to a culture of integrity, teamwork and collaboration is what drives our continued and sustainable growth.

We seek individuals who are engaged, capable and committed to continuous improvement.

If this sounds like you, apply today and discover your potential with Lakeside!

What you will be doing in the role of Application Engineering and Sales:

Your responsibilities may include, but are not limited to:

Primary Responsibilities

- Engage with customers to understand application requirements and recommend optimal products.
- Perform technical calculations and analysis, and troubleshoot process or product issues.
- Ensure seamless order execution from quotation through final shipment.
- Drive customer follow-up to maximize conversion and strengthen relationships.
- Leverage CRM tools to track and manage sales activities effectively.
- Deliver tailored solutions by building trusted partnerships with customers.
- Identify upsell and cross-sell opportunities during technical discussions.
- Serve as a technical liaison through in-person meetings, calls, and email communication.
- Collaborate with sales teams to develop and execute strategies that drive bookings growth.
- Define technical scope of work with customers and sales, including specifications, compliance tables, and conceptual designs.
- Review RFQs and customer documentation to establish proposal foundations.
- Prepare comprehensive proposals detailing scope, execution plans, equipment supply, engineering services, and commissioning/start-up.
- Develop vendor relationships and ensure compliance with customer and code requirements.

- Partner with Engineering to create solution concepts and support detailed sizing and selection of valves and instrumentation.
- Maintain knowledge of design and construction codes (e.g., ASME B31, CSA B149 series) to assess impacts on scope and design.

Other Duties

- Promoting specific product lines
- Gathering and maintaining competitive intelligence in specific markets
- Product training in specific types
- Providing customer education (schools and seminars)

Knowledge and skills required for the role:

- University Undergraduate Degree in Mechanical or Chemical Engineering
- One to Five (1-5) years' experience in the field
- Strategic thinking
- Effective communication skills
- Negotiation and networking skills
- Analytical and Problem-Solving skills
- Customer-oriented
- Results-oriented

What we give YOU!

- Flexible working schedules, including **hybrid remote work** programs
- A **competitive compensation** package, with RRSP-matching
- Comprehensive **benefits coverage** (medical, dental, vision, EAP & on-demand virtual health care)
- A culture that promotes healthy **work-life balance** with above-market **paid time off**
- A structured **training and development** program and opportunities for continuous learning
- Opportunity to participate in an award-winning **wellness program**!
