What you will be doing in the role of Technician, Mechanical Services - Intermediate:

- Perform corrective and preventative maintenance on valves, actuators, and related mechanical and instrumentation equipment, both in-shop and on customer sites
- Independently disassemble, inspect, repair, assemble, and test valves and valve automation equipment
- Install and remove valves and related equipment at customer sites as required
- Troubleshoot valve, actuator, and control system issues to ensure proper operation
- Conduct on-site walkdowns, inspections, valve stroking, data collection, and reporting
- Perform instrument setup, calibration, and testing to meet required specifications
- Review and interpret blueprints, drawings, and technical specifications to determine layouts, materials, and installation procedures

- Measure, mark, and position components for machining, fabrication, and installation
- Complete final assembly and testing of valve and valve automation products
- Diagnose and resolve equipment issues, including replacement of defective components
- Document inspection, repair, and testing activities accurately and completely
- Respond to valve-related emergencies during and outside of regular working hours as required
- Support shop maintenance activities and prepare equipment for shipping
- Build and maintain positive working relationships with customers
- Complete required time and expense entries

Knowledge and skills required for the role:

- Technician or Technologist diploma in a related mechanical field, preferably an Instrumentation diploma, or equivalent combination of education and hands-on experience
- Five (5+) years of hands-on shop and/or field experience in valve repair, maintenance, and automation
- Experience assembling, repairing, and testing valves, actuators, and valve automation equipment
- Experience working with machining, millwrighting, welding, rigging, and lifting operations
- Experience working in a regulated or quality-controlled environment is an asset
- Strong knowledge of industrial valves and pneumatic, hydraulic, and electric actuators
- Working knowledge of hydraulic, pneumatic, and electrical circuits
- Ability to interpret engineering drawings, schematics, and technical documentation
- Understanding of shop practices, machining processes, and measurement techniques
- Knowledge of applicable health and safety regulations for industrial environments
- Familiarity with process automation systems and applicable industry codes is considered an asset
- Proficient with mechanical hand tools, power tools, and diagnostic equipment
- Strong troubleshooting and analytical skills
- Ability to work independently while contributing effectively to a team environment
- Strong attention to detail and commitment to quality and safety
- Effective time management, organization, and prioritization skills
- Customer-focused mindset with strong professionalism and

- communication skills
- Comfortable working in physically demanding environments and responding to urgent service needs

What we give YOU!

- Flexible working schedules, including hybrid remote work programs
- A competitive compensation package, with RRSP-matching
- Comprehensive benefits coverage (medical, dental, vision, EAP & on-demand virtual health care)
- A culture that promotes healthy work-life balance with above-market paid time off
- A structured training and development program and opportunities for continuous learning
- Opportunity to participate in an award-winning wellness program!
