

Construction Labourer

Corrosion Service Company Limited (CSCL) was founded in 1950 by Thomas R.B. Watson as the first Canadian firm to specialize in cathodic protection and corrosion engineering. Our founding philosophy was based on the principles of providing great customer service and developing a deep understanding of customer needs, these same core principles still guide our company today.

We are an employee-owned company - This ownership structure gives us a unique perspective on business and ensures that our stakeholders (customers, employees, and partners), rather than shareholders, always come first. This is vital for a company such as ours, given that we exist primarily to protect the environment and the prosperity of the communities in which we live.

The world's most challenging, and interesting projects nationwide – you can work side-by-side with industry leaders and apply your skills to the most challenging and interesting projects. We value the diversity of our areas of practice and our people. It's what makes Corrosion Service a great place to work and grow.

What's in it for you:

- Industry-leading wages
- Work side-by-side with industry leaders in corrosion engineering and start building your successful career portfolio
- Chance to be part of a high-energy and high-performing team
- Collaborative working environment founded on respect
- Fitness club membership discount program

<u>Position Title:</u>	Construction Labourer
<u>Location:</u>	Markham, Ontario
<u>Job Type:</u>	Contract position (until December 2026) with full-time (40+) hours in majority of work weeks
<u>Pay Range:</u>	\$23.00 - \$30.00

GENERAL FUNCTION:

The Construction Labourer is responsible for the field-level scope associated with the various projects undertaken by CSCL. To achieve this objective, the Construction Labourer's primary responsibilities are:

- Assist with the completion of tasks related to construction projects. Examples of field tasks are as follows:
 - o Cathodic Protection Installations
 - o Line digs and anode well excavations
 - o Manual Labour
 - o Capital Construction Projects.
 - o Corrosion Inhibitor casing projects.
 - o Technical equipment installation.
 - o Rectifier Installations
- Assist with the completion of tasks related to field testing of AC mitigation projects.

- Maintenance and operational function of assigned vehicles, tools, and equipment.

QUALIFICATIONS:

- Must be able to lift 50lbs regularly and willing to routinely work outdoors.
- Should have solid hands-on technical capabilities, a valid driver's license, and be willing to travel, and work overtime.
- General understanding of electrical circuits and theory.
- Good initiative, adaptable, flexible, and team player.
- Truck use on off road terrain will be an asset.
- Any cathodic protection background will be an asset.

Note: All employment is conditional upon completing and obtaining a satisfactory background check, including employment, references, and criminal records (for which a pardon has not been granted) checks. **You must be legally eligible to work in Canada.**

Please advise the Human Resources Department to ensure your accessibility needs are accommodated throughout this process.

Thank you for your interest but only those individuals selected for an interview will be contacted.
